Education

2022-2026	Vietnam National University HCMC- University of Information Technology. B.Sc in Computer Science. GPA: 8.23/10.
-----------	--

Project

2024	Course Recommendation System using MOOCCubeX Dataset. - Built a personalized course recommendation system leveraging both traditional and deep learning-based recommenders. - Experimented with a wide range of models: BPRMF , CBF , NFM , KGAT . - Skills learned: Pytorch, Training deep learning model, Flask, AWS.
2024	Home Credit - Credit Risk Model Stability Competition. - Participated in a credit risk modeling competition to predict loan default probabilities. - Used LightGBM, XGBoost, and CatBoost for hyperparameter tuning. - Skills learned: Fine-tuning model.
2025	Tumor Segmentation in Medical Images. - Applied U ² -Net architecture to segment tumors in gastrointestinal images using the Kvasir-SEG dataset. - Built a web-based tumor segmentation app using FastAPI for the backend. - Skills learned: FastAPI, Training deep learning model, Docker.
2025	RAG-based Question Answering System with LangChain. - Developed RAG pipeline using LangChain, CTransformers, and local quantized GGUF LLMs. - Embedding with FAISS, local inference with CTransformers. - Exposed the system via a FastAPI backend with LangServe - Skills learned: LangChain, CTransformers, FAISS, PDF Processing.

Skills

Knowledge	NLP, LLM, Computer Vision, Transformers.
Frameworks	Pytorch, FastAPI, Langchain.
Programming	Python, C++, SQL.
Mlops	Docker, Terraform.
Misc	Git, shell, LaTeX.
English	IELTS 6.0.

Awards and Honors

2023	GPA 4.0 Incentive Scholarship.
2024	Silver Medal in a Kaggle competition.
